Fast PC Help

We Come To Your Office SM

Our customers say it all.

"We hired Fast PC Help to correct a minor problem, and ended up with a full service IT department! It's a pleasure working with a company that's so honest, proactive and hard working. We'd highly recommend them to anyone with PC or network needs."

- Kristen W, Co-Owner, Mortgage Service

"Our network went down, costing us thousands per hour. We called at 4:15pm, Thursday. They arrived by 5:30, and we were up and running when everyone reported to work Friday morning. They even found and eliminated a virus we didn't know about. Thank you, Thank you."

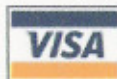

- Harold R, General Manager, Printer

"When lightning struck, we thought it'd be days before the problem was fixed. My whole office was down. They arrived within one hour and got everything running in barely over an hour. They also added a UPS so we wouldn't have to go through this again. We couldn't be more thrilled."

- RQ, President, Financial Services

"They were here in 30 minutes. The problem that had been nagging us for months was fixed in 15 minutes. A+ Service. Highly recommended."

- James P, VP, Auto Sales Group

You need your technology to work as hard as you do

There's nothing more frustrating than trying to get that major quote out to your customer when all of a sudden your PC freezes, or your printer turns temperamental.

Where can you turn for help?

You need a reliable service partner that's there when you need them, day or night. That responds to your call with a live voice, not a recording. That gets there fast and comes prepared. That takes accountability instead of wasting precious time with finger-pointing. That offers a no-nonsense guarantee to take the risk out of keeping your IT resources running. That gives you the time you need to run your business.

Our service vehicles have the equipment to fix or upgrade almost any pc or network.

That's **Fast PC Help**.

Turn to us when you need award-winning technology solutions at your fingertips.

Microsoft

Partner

We get you back in business. Fast.

When your system or network decides it's time for a break, you need a reliable expert that's just a phone call away. Fast PC Help answers your questions around the clock and, if necessary, arrives on-site prepared to fix your problem. And we don't charge extra for those last minute emergencies. With plenty of service options available, there's sure to be one that fits both your needs and your budget.

Avoid costly downtime.

Fast PC Help knows the most cost-effective way to handle technology issues is to fix them before they result in downtime. After a comprehensive review of your environment, we'll recommend the repairs, upgrades, and ongoing maintenance required to keep your IT resources up to the task.

Take performance to the next level.

In today's business climate, you're constantly challenged to do more with less. Why not make the most of what you already have? Simple things like improving storage and network traffic can result in significant increases in employee productivity and your level of customer service.

Fast PC Help recognizes that technology is merely a means to an end. It's your bottom line that really counts. By identifying ways to make your hardware, software, and network work together in support of your business goals, we'll boost the efficiency and performance of all of your resources.

Protect data and minimize risk.

Are you regularly backing up all of your critical information? Are you protected from hackers and viruses? If your data is your business, you can't afford to take chances. You need to know it's secure from natural disasters and malicious intervention. And, with non-compliance fines as high as \$100,000, it's important to make sure all of your software is properly licensed.

Fast PC Help can make invaluable suggestions after performing a complete audit of your backup and security procedures. Once we've implemented the changes, you'll have the peace of mind that comes from knowing you've taken the necessary steps to minimize your exposure and safeguard your most important asset.

Really connect with your customers.

From leveraging the Internet and making it an integral part of your business, to providing the infrastructure for your employees to stay connected with customers from virtually anywhere, Fast PC Help can make everything click. As experts in the technologies that run the web, we'll guide you through the maze to find the best possible solution to meet your unique needs.
