

Limited time offer for our valued customers!

When it comes to termites we don't mess around

At XXX Notch, protecting your home is serious business. To show you just how serious, we're extending a special offer to you - our valued customer. **Call between now and April 1st, 2003, and we'll install your Termatrol termite monitoring system absolutely free***. Valued at \$400 and up, that's like getting an entire year of monitoring at no cost. Regular termite treatments can cost as much as \$1,600. But with Top Notch, all you pay is the low quarterly maintenance fee.

The only thing visible is the results

XXX's comprehensive early detection system is not only affordable, it's an attractive, non-intrusive solution to termite control. The stations sit neatly in the ground, similar to a sprinkler head.

Termite Control Doesn't Have to be a Nuisance

Having XXX take control of your termites is as easy as 1-2-3:

- 1 We'll thoroughly inspect your property for active termite infestations, damage, and any conditions that may prove conducive to future activity.
- 2 We'll insert stations within the soil in all necessary areas.
- 3 We'll inspect your stations on a quarterly basis. We'll report our findings along with recommendations for additional measures should any activity be detected.

Don't be fooled into thinking termite damage can't happen to you

At XXX, our goal is to be the best pest control firm on the planet. How do we expect to achieve this? One satisfied customer at a time.

You have enough things to worry about. Call XXX and get consistent, reliable service for both pest and termite control. If the Phillies can trust us to keep Jack Russell Memorial Stadium in tip-top shape, our dedication to customer satisfaction will hit home with you too.

Call XXX today for a free estimate.

(XXX) XXX-XXXX

Call by April 1st, 2003, and get your monitoring system installed absolutely free*! Valued at over \$400!
